---

## Professional Summary

---

Experienced Blockchain Developer with over 5 years of hands-on experience in designing, implementing, and supporting blockchain applications. Skilled in smart contract development, cryptographic algorithms, and decentralized applications (dApps). Proven track record of delivering high-quality blockchain solutions for various industries.

---

## Skills

---

- Blockchain Platforms: Ethereum, Hyperledger, Corda, Quorum
- Programming Languages: Solidity, JavaScript, Python, Go
- Smart Contracts: ERC20, ERC721, Truffle, Hardhat
- Cryptography: Public Key Infrastructure (PKI), Hash Functions, Digital Signatures
- Tools: Remix, Ganache, Metamask, Web3.js, Ethers.js
- Databases: MongoDB, MySQL, PostgreSQL
- Version Control: Git, GitHub, GitLab

---

## Professional Experience

---

### Blockchain Developer

XYZ Blockchain Solutions, San Francisco, CA

Jan 2020 – Present

- Developed and deployed smart contracts on Ethereum using Solidity.
- Implemented decentralized applications (dApps) with Web3.js and Ethers.js.
- Designed and built blockchain-based solutions for supply chain management.
- Integrated blockchain applications with existing systems using RESTful APIs.
- Conducted code reviews and provided mentorship to junior developers.

### Blockchain Engineer

ABC Tech Corp, New York, NY

Jun 2017 – Dec 2019

- Developed and tested smart contracts using Truffle and Hardhat frameworks.
- Collaborated with cross-functional teams to design blockchain solutions for financial services.
- Implemented cryptographic algorithms to ensure data integrity and security.
- Participated in blockchain network setup and maintenance activities.
- Wrote technical documentation and conducted training sessions for internal teams.

---

## Education

---

Bachelor of Science in Computer Science

University of Technology, City, State

Graduated: May 2017

---

## Certifications

---

- Certified Blockchain Developer
- Certified Ethereum Developer

---

## Projects

---

### Decentralized Voting System

- Developed a decentralized voting platform using Ethereum smart contracts.
- Implemented voter authentication and secure vote tallying mechanisms.
- Conducted security audits and performance testing.

### Blockchain-based Supply Chain Tracking

- Designed a blockchain solution to track the provenance of goods in the supply chain.
- Developed smart contracts to record and verify transactions.
- Integrated with IoT devices for real-time data capture.
